Summary

Results-driven designing, developing, and maintaining applications. Adept at collaborating in team environments to deliver high-quality software solutions.

- Developed frontend and backend APIs for a delivery-based web application using HTML, CSS, JavaScript, Python, Django, and Java.
- Built the backend, database, and integrated components with technologies such as TypeScript, XML, JSON, and Angular.
- Utilized frameworks including Spring Boot, Spring REST, and MVC to enhance application functionality.
- Implemented CI/CD practices to streamline development and deployment processes.
- Contributed to team projects using real-time tools like Maven, GitHub, and Postman.

Technical Skills

- ❖ **Programming Languages:** Java, Python, JavaScript, TypeScript, HTML, CSS
- ❖ **Frameworks:** Django, Spring (Core, Boot, REST), ReactJS
- ❖ **Databases:** MySQL, MongoDB
- ❖ **Tools:** Git, Postman, Maven, GitHub
- ❖ **Other:** DSA, Linux

Projects

- ❖ **E-Commerce Website:** <https://e-palshop.vercel.app/>
 - Designed and developed a dynamic e-commerce website with a focus on responsive design and user experience.
 - Technologies: HTML, CSS, JavaScript, ReactJS.
 - Enhanced site performance and accessibility through optimized coding practices.
- ❖ **Restaurant Website:** <https://reactproject-wine.vercel.app/>
 - Created a dynamic restaurant website, emphasizing user-friendly interface and mobile responsiveness.
 - Technologies: HTML, CSS, JavaScript, ReactJS, NodeJS, Bootstrap.
 - Improved loading speeds and overall user engagement through clean design.
- ❖ **UI/UX Design Project:** <https://to-do-list-two-ebon.vercel.app/>
 - Designed user interfaces and experiences for a to-do list application.
 - Technologies: HTML5, CSS3, NodeJS, ReactJS, Local Storage, Bootstrap.

Certifications

- ❖ **Java Collection Framework:** Provides an architecture to store and manipulate the group of objects.
 - ❖ **Python Programming:** Learn basic python programming how to use industry day to day life.
 - ❖ **Low-Level Design of Payment Apps:** These apps log, track, and monitor expenses among users or groups.
 - ❖ **SOLID Principles Every Developer Must Know:** SOLID is an acronym that stands for five key design principles: single responsibility principle, open-closed principle.
 - ❖ **Fundamentals of Docker & Kubernetes:** DevOps is a culture emphasizing collaboration and communication between software developers and IT professionals.
 - ❖ **Build a Career in DevOps Engineering:** DevOps is a culture emphasizing collaboration and communication between software developers and IT professionals.
 - ❖ **Business Model Workshops organized by the Entrepreneurship Cell, IIT Bombay:** create, design, launch and how to position in the market.
-

Education

- ❖ **Bachelor of Engineering in Information Technology | Thakur College of Engineering & Technology (Autonomous), Mumbai**
